

Kali Linux Setup

Introduction

This repository contains my practical work for setting up and configuring Kali Linux. The repository includes screenshots showing the different steps performed during the Kali Linux setup.

Objectives

- Install and configure Kali Linux.
- Understand the Kali Linux desktop environment.
- Learn basic Linux terminal commands.
- Configure the system for cybersecurity learning.
- Document the setup process with screenshots.

Screenshots

1. Kali Linux Installation

This screenshot shows the Kali Linux installation/setup process.

2. Virtual Machine Setup

This screenshot shows the configuration of Kali Linux in the virtual machine environment.

3. Kali Linux Desktop

This screenshot shows the Kali Linux desktop after successful installation.

4. Kali Linux Terminal

This screenshot shows the Kali Linux terminal being used to perform basic Linux commands.

5. System Configuration

This screenshot shows the system configuration/update process performed after installing Kali Linux.

Tools Used

- Kali Linux
- VirtualBox
- Linux Terminal
- Windows Host System

Conclusion

Kali Linux was successfully set up as a cybersecurity learning environment. The screenshots document the main steps of the installation and configuration process.
